Vacuum Gauges

Custom

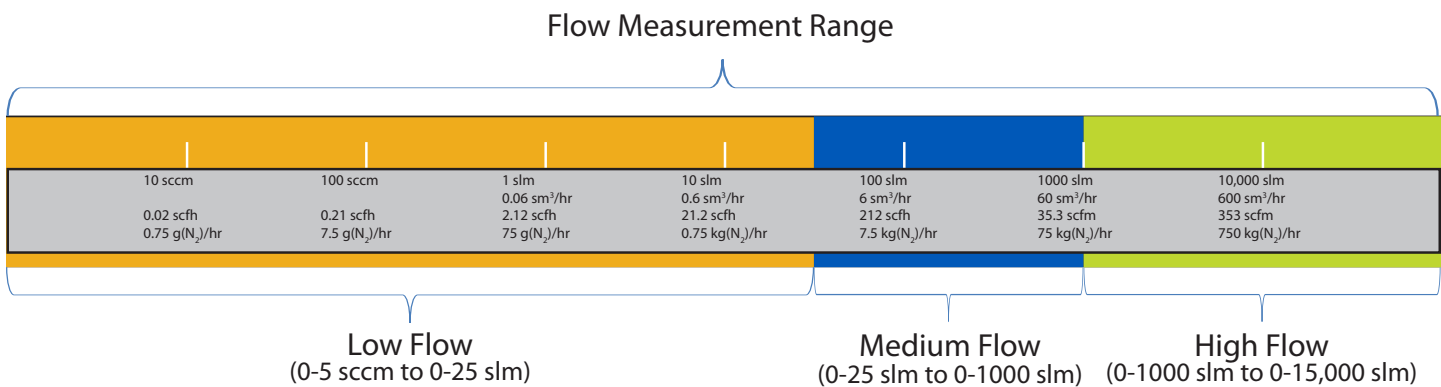

Mass Flow Calibration

You need it now...

We get it! And we are here to help! Our service team and application engineering staff are dedicated to get your flow instrument calibrated and returned to you quickly.

We have the infrastructure and state-of-the-art metrology to handle flow rates from below 1 sccm to above 15,000 slm.

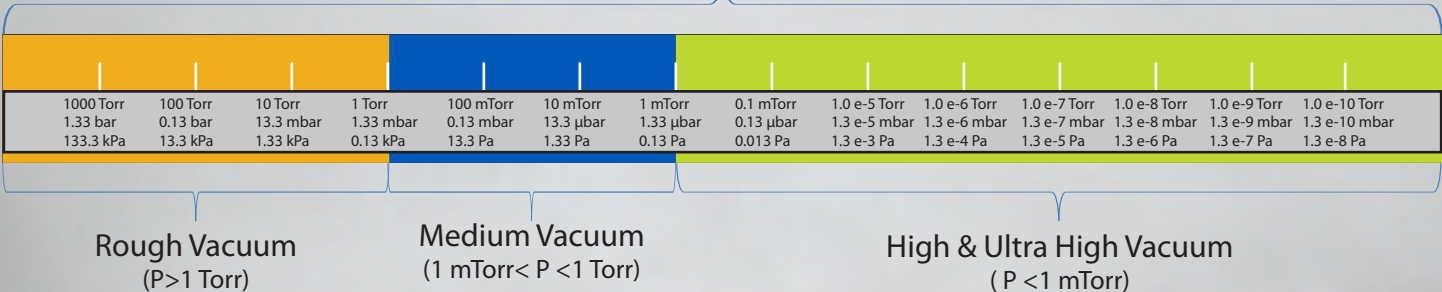

Vacuum Gauge Calibration

Get your vacuum gauge calibrated by the experts in vacuum gauging technology. Teledyne brings the same outstanding reputation for reliability to our calibration services that we provide to our vacuum customers.

Our calibration systems and metrology cover a wide range of vacuum levels. And we back our work with an entire team of support staff including application engineers who are available to you to keep your systems and processes at peak performance.

Vacuum Measurement Range

Here When You Need Us

Buy from the company that makes it easy!

Teledyne's technical staff is available to help you with application review, model selection, and product configuration. We listen to you to ensure that we understand the requirements of your application. Collectively, our technical staff has well over 100 years of experience in a broad array of applications. Put our vacuum control expertise to use for you.

Lifetime Technical Support

We are always here for you. If you have questions about measurement and control of vacuum or you want to discuss a new application - we are here to help!

Stocked Inventory

We may already have the instrument you need; it is ready to ship!

Global Coverage

Teledyne Hastings has sales and service staff located around the world. Our team is ready to help you where you need us!

Fast Delivery

We understand the importance of fast, on time delivery. When you need it even faster, we are able to provide expedited build, calibration and delivery service to keep your application up and running.
